Chamberhoods.

2025 RECAP

IN PARTNERSHIP WITH Caisse Alliance

The Timmins Chamber hosted our annual Chamberhoods series in September, segmenting our community into eight Chamberhoods, with series partner Caisse Alliance. This initiative connects businesses, Chamber leadership, and Mayor and Council to discuss opportunities, challenges, and exchange ideas within each unique neighborhood.

Housing and Development

Housing shortage remains a top barrier to workforce attraction and community growth. Businesses are interested in exploring neighbourhood destination district concepts.

Infrastructure

Strong interest in developing a business case for airport industrial development and transportation hub. Also noted progress being made in municipal infrastructure projects.

Community Safety

Businesses report mixed results from targeted initiatives and pilot projects. Crime activity shifting to new areas and petty crime continuing to impact businesses.

Tourism

Interest in seeing tourism efforts diversify beyond outdoor recreation to include arts, culture, and other experiences that draw a wider range of visitors.

Business Resilience

Members are finding creative ways to diversify by adding new services, exploring different markets, and adapting to changing customer needs.

Next Steps

- Incorporate these insights into ongoing advocacy priorities;
- Advance policy discussions related to housing and infrastructure;
- Encourage dialogue on business supports and growth;
- Communicate City projects and public safety resources to members.
